Jakarta 12520
Indonesia

Dear Ms. Sophie Oktaviani,
HR Manager, BP
Greater Jakarta Area, Indonesia

I had the opportunity to attend the IPA Convex multiple times between 2022 and 2024. Throughout these events, I explored various oil and gas service company booths and was particularly impressed by Halliburton's unwavering commitment to innovation and excellence in delivering cutting-edge technologies, products, and services to the energy sector. One highlight was attending a presentation by Mr. Ming Ongkwan, Director of Strategic Business Carbon Management, where I was inspired by Halliburton's dedication to sustainability, particularly through its initiatives in Carbon Capture, Utilization, and Storage (CCUS). I am writing to express my strong interest in the **Field Engineer** position at PT Halliburton Indonesia, as advertised on the Campus Recruitment event poster for UPN Yogyakarta (17--20 June 2025), which was posted on LinkedIn two weeks ago.

My practical experience began during my undergraduate studies, when I developed an IoT-based ground movement sensor. I successfully led geophysical surveys across 16 locations in West Java and contributed to securing groundwater availability in 10 rural areas on the island of Java. These experiences have equipped me with a solid understanding of several instruments, including:

- Proficient in programming languages such as **Python**, **C++**, and **MATLAB**, applied to geophysical methods including seismic analysis, machine learning, AI, and instrumentation systems and control.
- Skilled in scientific documentation tools such as **LaTeX** and **Microsoft Office**, with working familiarity in the **Linux** operating system.
- Experienced in collaborative work using **GitHub** for version control, **Primavera P6** for project management, and **Microsoft Teams** for team communication.

I recognize that there is still much room for personal and professional growth. Therefore, with a strong sense of enthusiasm and curiosity, I am ready to adapt and collaborate, guided by the company's core values of **collaboration, creativity, reliability, respect, integrity, and safety**.

Thank you to Mr. Wisnu Nugraha and the Talent Acquisition team at PT. Halliburton Indonesia for your attention. I hope this letter serves as a valuable reference for proceeding with the recruitment process. I am truly eager to contribute to Halliburton by helping develop innovative solutions that optimize asset value and support a sustainable energy future.

Hormat Saya,

Rendy Ramadhana Wahyudi
